A Guide to Colour Mutations & Genetics in Parrots

The text is presented in three parts. The author takes the reader through a comfortable and absorbing introduction to understanding the basic principles of primary and combination mutations and colour genetics in the first two parts. Part three is for the adventurous, being the technical manifest of genetics in parrots. The text is supported throughout this 296-page title with over 700 colour photographs, numerous breeding expectations, an index of primary mutations in all parrot species, and glossary and explanation of genetic terms. This highly readable and definitive work will become a major reference source internationally for many years to come.

Hard Cover ISBN 978 0 9577024 7 9 Author: Dr Terry Martin BVSc

A Guide to Asiatic Parrots (Revised Edition)

This complete revision sees the addition of over 70 colour images of new mutations, improved text including new genetic tables and more information on nutrition, housing and breeding. Species include the Indian Ringnecked Parrot and their many mutations, the Alexandrine, Plum-headed, Derbyan, Malabar, Slaty-headed, Moustache, Malayan Long-tailed and Blossom-headed Parrot.

ISBN 978 0 9587102 5 1 Authors: Syd and Jack Smith

Asiatic Parrots and their Mutations

This 560-page book has become the standard reference on this species worldwide. All Psittacula species are covered including their husbandry, diet, housing, breeding and disease. The focus of the extensive text is on all colour mutations, explanations of correct names and hereditary types. The quality of photographs provides the reader with visuals of all colour morphs. Regarded as ‘the bible’ on Asiatic species.

Hard Cover ISBN 90 9017326 9 Authors: T Bastiaan and GJJ Bastiaan

A Guide to Neophema & Psephotus Grass Parrots (Revised Edition)

One of ABK Publications top selling A Guide to… titles worldwide, this revised edition features over 160 full colour images of mutations, examples of breeding expectations, housing, feeding and management. Species include the Bourke’s, Turquoise, Scarlet-chested, Elegant, Blue-winged, Rock, Orange-bellied, Red-rumped, Mulga, Blue-bonnet, Hooded, Golden-shouldered and Paradise Parrot.

ISBN 978 0 9587102 4 4 Author: Toby Martin

A Guide to Neophema and Neopsephotus Genera and their Mutations

This 224-page colourful title presents 300 photographs and in-depth details on the colour mutations in the Bourke’s, Turquoise, Scarlet-chested, Elegant, Blue-winged, Rock and Orange-bellied Parrots. General chapters include: General Management, Housing, Feeding, Breeding, Health and Disease, Plumage, Pigments, Colours and Colour Mutations, Extensive Genetic and Mutation Details.

Hard Cover ISBN 978 0 9804924 0 8 Author: Dr Alain Campagne MD

Soft Cover ISBN 978 0 9804924 1 5

Australian Grass Parrakeets—The Neophema

This 191-page hardcover book covers the Housing, Diet, Management, Diseases and Mutations of the Neophema species—Turquoise, Scarlet-chested, Elegant, Blue-winged, Orange-bellied, Rock and Bourke’s Parrakeets.

Hard Cover ISBN 0 9587727 4 6 Authors: Stan Sindel and James Gill

Australian Grass Parrakeets—The Psephotus and Northiella Genera

This 203-page hardcover book covers the Housing, Diet, Management, Diseases and Mutations of the Psephotus and Northiella genera—Red-rumped, Mulga, Paradise, Golden-shouldered, Hooded, Blue-bonnet and Naretha Blue-bonnet Parrakeets.

Hard Cover ISBN 0 9587727 5 4 Authors: Stan Sindel and James Gill
A Guide to Eclectus Parrots (Revised Edition)

This 160-page title features a comprehensive description of all 10 subspecies. Chapters include: Taxonomy and Identification, Eclectus in the Wild, Eclectus in Captivity—as Pet and Aviary Birds, Housing, Feeding, Breeding, Artificial Incubation and Handraising, Troubleshooting and Symptoms of Breeding Failure, Taming and Training, Colour Mutations and Genetics, Diseases and Disorders. Featuring over 250 colour photographs, this book is available in both soft and hardcover format.

Hard Cover ISBN 978 0 9750817 0 9 Authors: Dr Rob Marshall BVSc MACVSc (Avian Health) and Ian Ward

A Guide to Macaws as Pet and Aviary Birds

Featuring spectacular full colour photography throughout, this 136-page softcover title is packed with valuable and highly useable information. Section 1: Breeding Macaws (including aviary design and construction, nutrition, breeding, incubation and handrearing, diseases and disorders). Section 2: Macaws as Pet and Companion Birds (including housing, feeding, health aspects, behavioural problems). Section 3: Species (with details on all macaw species).

ISBN 978 0 9577024 9 3 Author: Rick Jordan

A Guide to Popular Conures

Combined with their own experiences, Ray Dorge and Gail Sibley have recorded the results of an extensive research of large conure breeders covering such topics as Conure Behaviour, Obtaining a Conure, Husbandry, Housing, Diet and Nutrition and Diseases and Disorders. Specific details on 13 of the most popular species kept in aviculture include Pet Quality, Terminology, Description, In the Wild and Breeding. Featuring beautiful full colour photography throughout, this title is sure to satisfy all fanciers and breeders of these parrots.

ISBN 978 0 9577024 3 1 Authors: Ray Dorge and Gail Sibley

A Guide to Australian White Cockatoos

Richly illustrated and full of practical hints, this well-researched book features facets of the author’s personal experience which shine throughout its pages. Species featured are the Sulphur-crested Cockatoo, Short-billed Corella, Eastern Long-billed Corella, Major Mitchell’s Cockatoo and Galah. Contents cover Management, Housing, Feeding and Nutrition, Breeding, Diseases and Disorders Common to Cockatoos and Species Profile covering Distribution, Subspecies, Sexing, Breeding, General Comments and Mutations.

ISBN 978 0 9577024 1 7 Author: Chris Hunt

A Guide to Black Cockatoos

This title, featuring 300 colour photographs over 160 pages, is available in hard and soft cover. Chapters on Black Cockatoos in Captivity include Taxonomy, Conservation, Housing, Nestlogs, Feeding, Breeding, Infertility, Nest Inspection, Artificial Incubation, Handrearing, Companion Birds and Diseases and Disorders. The individual species section features all the black cockatoo species and subspecies of the genus Calyptorhynchus, the Palm Cockatoo Probosciger aterrimus and the Gang Gang Cockatoo Callocephalon fimbraitum.

Hard Cover ISBN 978 0 9750817 4 7 Authors: Neville and Enid Connors

Soft Cover ISBN 978 0 9750817 3 0

A Guide to Cockatiels and their Mutations (Revised Edition)

This revised edition features extensive colourful information on Cockatiels in the wild and in captivity as pet and aviary birds. Chapters include Stock Selection, Housing, Breeding, Incubation and Handrearing, Pet and Pet Behaviour Aspects and Health and Disease. The Colour Mutation section would be the most comprehensive of any title in the world.

Hard Cover ISBN 978 0 9750817 8 5 Authors: Diana Andersen and Dr Terry Martin BVSc

Soft Cover ISBN 978 0 9750817 7 8

Australian Cockatoos

Beginners as well as experienced aviculturists will find much useful information to assist them in achieving the dream of all cockatoo breeders, to produce healthy parent-reared babies. This superbly presented 252-page hardcover book with colour photographs throughout covers Housing, Diet, Management and Diseases. Species covered include all black cockatoos, white cockatoos and Cockatiels.

Hard Cover ISBN 0 9587727 1 1 Authors: Stan Sindel and Robert Lynn

A Guide to Australian Long & Broad-tailed Parrots and New Zealand Kakarikis

Topics include the general management, housing, diet, care, breeding and handrearing of the Crimson-winged, Princess, Regent, Superb, King, Red-capped, Mallee Ringnecked, Cloncurry, Port Lincoln and Twenty-eight Parrot and the Red-fronted and Yellow-fronted Kakariki.

ISBN 978 0 9587455 3 6 Author: Kevin Wilson
Australian Coral-billed Parrots
This 208-page book is a field and avicultural study of the true Australian Coral-billed Parrots. Each species is discussed at length in individual chapters dealing with Field Observations, Avicultural Techniques, Breeding Procedures, Subspecies and Racial Variations. The general chapters on Housing, Diet, Management and Disease provide detailed information on the maintenance of this group in aviaries. Species covered are the King, Red-winged, Superb, Regent and Princess Parrot.

Hard Cover ISBN 0 9587727 7 0 Authors: Stan Sindel and James Gill

Australian Broad-tailed Parrots—The Platycercus and Barnardius Genera
This excellent hardcover book is a field and avicultural study of the Australian Broad-tailed Parrots of the genera Platycercus and Barnardius. Over 350 full colour pages, each species is discussed at length in individual chapters dealing with Field Observations, Avicultural Techniques, Breeding Procedures, Subspecies, Racial Variations and Mutations. Species covered are Eastern, Pale-headed, Northern, Crimson, Yellow, Adelaide, Green and Western Rosellas. The title also includes the ringnecked parrots—Mallee Ringneck, Cloncurry and Port Lincoln Parrots.

Hard Cover ISBN 0 9587727 6 2 Authors: Stan Sindel and James Gill

A Guide to Rosellas and their Mutations (Revised Edition)
Russell Pringle, well-known aviculturist and Rosella breeder, has presented an informative and highly readable revised edition that is lavishy supported with 455 superb photographs. Comprehensive chapters include Housing, Breeding, Feeding, General Management, Health and Disease. Species chapters include the Adelaide, Crimson, Eastern, Green, Northern, Pale-headed, Western and Yellow Rosellas. Extensive details on genetics and all mutations established worldwide are a highlight of this revised edition.

Soft Cover ISBN: 978-0-9804924-3-9

A Guide to Lories & Lorikeets (Revised Edition)
Completely reformatted and revised including new sections on Lories and Lorikeets as Pets, Diseases and Disorders and Colour Mutations and Breeding Expectations, this title is bigger (with 152 pages), better and more colourful than the highly successful original edition. Peter Odekerken's exceptional photography again is beautifully supportive of the informative text which together make this a must-have title.

ISBN 978 0 9577024 4 8 Author: Peter Odekerken

Australian Lorikeets—Experiences in the field and aviary
Consisting of 217 pages in hardcover format, general chapters relating to the husbandry requirements of Australian lorikeets cover the topics of Housing, Diet and Management. The Species sections present concise information on Subspecies (where applicable), Habitat, Range, interesting Field Notes on each species In the Wild, as well as Breeding, Sexing, Courtship Display, Nesting and Hatching and Mutations in captivity. Health topics include Basic First Aid, Quarantine and Parasitic, Bacterial, Fungal, Viral and Non-infectious Diseases.

Hard Cover ISBN 978 0958772785 Authors: Stan Sindel and James Gill

Hancock House Encyclopedia of the Lories
Presented in hard bound cover with 432 pages, this comprehensive book features 175 full colour photographs of these unique and colourful birds. Arranged to give immediate access to specific subjects and species, the first part is an encyclopedia covering nearly 100 different subjects from aviaries and conservation to folklore and nest sites, all set out in alphabetical order. In the second part, the biology of every species is described under standard headings, which provide detailed descriptions of plumage, chicks, eggs, habitat, conservation, nesting and more. A comprehensive index includes common and scientific names of species, as well as individual and institutional names and zoos mentioned in the text.

Hard Cover ISBN 0 88839 413 6 Author: Rosemary Low

A Guide to Grey Parrots
This title, authored by prolific avicultural author, Rosemary Low, stands alone when compared to many other books on the Grey Parrot. Rosemary presents interesting and diverse snippets gathered from various keepers' personal experiences in pet and aviary situations. Supported by numerous colour images, topics examine the Grey Parrots in the wild as well as their housing, management, feeding, nutritional requirements, behaviour, enrichment, breeding, handraising, training and veterinary aspects in captivity. A must-read for anyone contemplating to keep or currently keeping this highly intelligent species.

Hard Cover ISBN 978 0 9750817 5 4 Author: Rosemary Low
Soft Cover ISBN 978 0 9750817 6 1
Caiques

In appearance and behaviour, caiques are among the most distinctive of parrots. No other parrot has the same combination of characteristics: fearless, inquisitive and playful with a huge ego and a strong will. However no reference book existed for the caique lover! So here it is! All the information in this 86-page book relates specifically to caiques, except the health care section which applies to all parrots. Chapters include Captive History, Care and Housing, Diet and Nutrition, Pets, Breeding, Handrearing, Health and In the Wild. With 25 excellent colour photographs including all subspecies and chicks at various stages of development, this, Rosemary Low's 25th book, is sure to satisfy.

Soft Cover ISBN 80 7322 042 3 Author: Rosemary Low

Amazon Parrots—Aviculture, Trade and Conservation

Chapters over 324 full colour pages feature all aspects of Housing, Diet, Breeding, Companion Birds and Health Care in Captivity followed by chapters on Life in the Wild, Conservation and Trade. All species are explained in individual chapters. One of the most definitive works available in the world today, presented in hardcover format.

Hard Cover ISBN 0 9531337 4 5 Author: Rosemary Low

Lovebirds—Owners Manual and Reference Guide

This up-to-date 304-page hardcover title presents comprehensive details on nine members of the Agapornis genus. Supported by numerous colour photographs the chapters include: Buying, Feeding, A Home for your Lovebirds, Breeding, Breeding Problems, Handraising, Breeding Mutations, Feather Structure, Genetics, Mode of Inheritance and Transmutations. Further chapters cover extensively the specific species, their breeding, mutations and showing. The latest mutations are discussed in detail. This title is an essential resource for all lovebird breeders.

Hard Cover ISBN 1 8527924 6 9 Author: Dirk Van den Abeele

The Encyclopedia of Agapornis

This title comprises 234 pages with 304 colour photos covering the entire Agapornis genus in detail. The focus of this book is almost purely genetics, mutations and judging from an exhibition point of view with the text interspersed between photos—a unique layout. There are an enormous number of rare mutations and colour combinations illustrated. Recommended for the advanced breeder, giving them a broader perspective of what is happening around the world in lovebird breeding.

ISBN: 978 85 98478 13 5 Author: Dr Alessandro D’angieri

Guide to the Quaker Parrots—Second Edition

This 122-page softcover title provides essential information for the owner of a pet or companion Quaker Parrot. The endearing personality and ability to mimic human speech makes this species a popular pet. Essential details guide the new owner through Selection, Introduction to a New Household, Diet, Cages and Toys, Behavioural Development, Training, Grooming, Providing a Stimulating Environment, Socialisation, Positive Reinforcement, Developing Trust, Behavioural Problems and more.

ISBN 978 0 7641 3668 9 Author: Mattie Sue Athan

SPECIALIST TITLES

Encyclopedia of Aviculture

This 832-page, indexed hardcover tome provides everything that the serious aviculturist would need to know about any species that they keep or would be attracted to keep. Glen Holland, together with other recognised avicultural experts from around the world, formulated the in-depth information presented in this encyclopedia. General chapters include Stress Management, Control of Vermin, Propagation of Livefood, Avicultural Management and Compatible Species, each chapter supported by explanatory colour photographs and diagrams. The aviculturist is provided with proven, practical methods for the successful management and propagation of most of the families of birds in the world. This title is more suited to the serious aviculturist who would appreciate the wealth of research and extensive information provided on a vast array of species.

Hard Cover ISBN 0 88839 460 8 Author: Glen Holland

Parrots of the World—An Identification Guide

Hardcover with dust jacket, 414 pages. Joseph Forshaw's name is synonymous with quality parrot books. In the latest offering, he provides us with a comprehensive identification guide to the parrots of the world. This is a substantial work, offering great value. The book is essentially presented in two parts—‘Parrots of the Old World’ and ‘Parrots of the New World’. A brief description of each tribe is followed by a more detailed description of each species represented within that tribe. Subheadings for each species include Common English Name, Latin Name, Other Names, Distribution, Habitats and Status, Habits, Behaviour, Calls, Similar Species, Suggested Localities, Subspecies listings and their distribution. For the serious parrot enthusiast, this excellent book is a must-have.

FINCHES AND SOFTBILLS

A Guide to Zebra Finches

This title features 96 full colour pages of easy-to-read, highly informative text covering such topics as History and Ecology, Housing, Feeding, Health, Choosing Stock, Exhibiting and details of all currently recognised Australian colour varieties. A must for any Zebra Finch enthusiast.

ISBN 978 0 9577024 2 4 Authors: Milton, John and Joan Lewis

A Guide to Gouldian Finches (Revised Edition)

This complete revision features concise information on Gouldian Finches in the Wild and in Captivity, including Housing, Nutrition, Breeding, Mutation and Colour Breeding, Health and Disease. Supported by over 330 images, including an extensive selection of mutations.

ISBN 978 0 9750817 1 6 Edited by: ABK Publications

Contributing authors: Dr Milton Lewis BSc (Hons), PhD, Dr Terry Martin BVSc, Dr Rob Marshall BVSc, MACVSc (Avian Health) and Ron Tristram
A Guide to Australian Grassfinches
Russell Kingston, a well-known aviculturist and finch breeder, has presented an informative and highly readable text that is lavishly supported with superb colour photographs. Details of each species includes visual differences between the sexes. General topics covered include Acquiring Birds, Quarantine, Nutrition, Housing, Compatibility and Regulating the Breeding Season, to name just a few. A must for every finch breeder’s library.
ISBN: 0 9587102 2 8  Author: Russell Kingston

Hancock House Encyclopedia of Estrildid Finches
This 264-page essential guide offers detailed descriptions of the colourful and popular Estrildid Finches: Waxbills, Mannikins, Munias, Grassfinches, and Parrotfinches. Over 400 colour photographs highlight the species account of their biology, distribution and full avicultural care.
Hard Cover ISBN 08 8839 4934  Authors: Dr Matthew M. Vriends & Tanya Heming-Vriends

The Gouldian Finch
With 239 pages and over 100 colour plates, this book, based on many years of research and breeding experience, is a wealth of information, covering this species in the wild and in captivity, health and diseases, nutrition, ultraviolet vision, mutations and genetics and much more. Case bound and finished in hardcover with gold leaf, this quality title will be highly sought after for decades to come.
Hard Cover ISBN 0 9585612 1 4  Authors: Stewart Evans and Mike Fidler

Australian Softbill Management
Consisting of 142 pages presented in a hardcover format, the book covers aviary studies of wrens, robins, chats and dotterels. Although not the definitive work on softbills, the author’s observations and writings represent a superb resource for the aviculturist wishing to venture into the keeping of insectivorous birds.
Hard Cover ISBN 0 9587727 3 8  Author: Rosemary Hutton

Pekin Robins and Small Softbills—Management and Breeding
Until now a definitive manual has not been readily available to the keepers of Pekin Robins and softbills. The author is highly respected for his knowledge gained over 30 years. Over 250 pages his detailed drawings, illustrative watercolours and colour plates depict each of the species beautifully. Topics covered include in-depth explanations on Housing, Acquisition, Handrearing, Feeding, Food Cultivation and Health Care. The extensive list of softbill species range from mesias, minlas, yuhinas, laughing thrushes, tits, bulbuls and white-eyes to flycatchers, robins, tanagars and honeycreepers. A definitive reference on these species.
Hard Cover ISBN 978 0 88839 606 8  Author: Peter Karsten

A Guide to Basic Health & Disease in Birds (Revised Edition)

The 112 pages of the book feature full colour photographs throughout, sketches, tables and easy-to-read valuable information. From finches to macaws, Dr Mike Cannon discusses common diseases, quarantine procedures, worming, parasite control, recognising health and nutritional problems, use of antibiotics, working with your avian veterinarian, and basic steps required to maintain healthy birds and good aviary management.

ISBN 978 0 9577024 5 5 Author: Dr Michael Cannon BVSc, MACVSc (Avian Health)

A Guide to Incubation & Handraising Parrots

Written by Western Australian aviculturist, Phil Digney, A Guide to Incubation & Handraising Parrots covers all necessary requirements needed to successfully take an egg through to a fully weaned chick. Beautifully illustrated with colour images throughout, this valuable title also includes many charts and diagrams and informative text laid out in an easy-to-read format. An invaluable reference for any serious bird breeder.

ISBN 978 0 9587102 1 3 Author: Phil Digney

Under the Microscope—Microscope Use and Pathogen Identification in Birds and Reptiles

This 56-page full colour, easy-to-read reference book on microscope use and pathogen identification in birds and reptiles is a must for aviculturists and herpetologists with a desire to be in control of health problems in their collections.

Soft Cover ISBN 978 0 9577024 8 6 Author: Dr Danny Brown BSc (Hons), BVSc (Hons), MACVSc (Avian Health)

The Complete Guide to Successful Sprouting for Parrots

This valuable 110-page title presents all the benefits and positive results of feeding sprouted foods. Chapters culminated from decades of various breeder experiences cover a number of questions including Why Feed Sprouts?; Organic or Commercial Foods—Is There a Difference?; Successful Sprouting; Caring for Your Sprouts; Now, Who Will Eat Them?; Nutritious Meals for the Whole Family. The five Appendices cover Resources and Additional Information, Trouble Shooting, Preventative Nutrition for Dogs and Cats, Homemade Egg Food and General Sprouting Guidelines.

Soft Cover ISBN 978 1419684791 Author: Leslie Moran

PIGEONS, DOVES, QUAIL

A Guide to Pigeons, Doves and Quail

Written by Dr Danny Brown, this book, a world first in aviculture, covers all species in this group available to the Australian aviculturist. Stunning colour photography throughout is supported by precise, easy-to-read information on the care, management, health and breeding of these unique birds.

ISBN 978 0 6462305 8 0 Author: Dr Danny Brown BSc (Hons), BVSc (Hons), MACVSc (Avian Health)

The Flying Vet’s Pigeon Health and Management

This hardcover (with dust jacket) 321-page full colour title presents a veterinary guide to health control, medication use and the development of race fitness for the competitive pigeon fancier and is supported by 285 colour photos. This excellent title is a compulsory reference for all racing pigeon fanciers and has been added to the compulsory reading list for Post Graduate Veterinary students.

ISBN: 1 8766779 1 0 Author: Dr Colin Walker BSc, BVSc, MRCVS

PHEASANTS AND WATERFOWL

A Guide to Pheasants & Waterfowl

Author of the highly regarded A Guide to Pigeons, Doves & Quail, Dr Danny Brown has produced this superlative title on pheasants and waterfowl. The informative easy-to-read text is lavishly supported with beautiful colour images throughout. Covering all aspects of caring, housing, management and breeding of these unique birds, this title is a credit to the author and an ideal reference source.

ISBN 978 0 9587102 3 7 Author: Dr Danny Brown BSc (Hons), BVSc (Hons), MACVSc (Avian Health)
Backyard Poultry—Naturally (Second Edition)

This 154-page, softcover book covers everything the backyard farmer needs to know about poultry, including Husbandry, Breed Selection, Feeding, Housing, Breeding, Egg Production and Health. The author has focused on herbal and homeopathic methods of treating poultry injuries and illnesses as well as explaining how to feed poultry on natural products, as opposed to commercial pellets. A selection of both black and white and colour photographs and illustrations are found throughout the book, including photographs of various breeds.

Soft Cover ISBN 0 9585590 1 5  Author: Alanna Moore

Storey's Illustrated Guide to Poultry Breeds

More than 128 birds strut their stuff across the 278 full colour pages of this glossy pictorial delight featuring Chickens, Ducks, Geese, Turkeys, Emus, Guineafowl, Ostriches, Partridges, Peafowl, Pheasants, Quail and Swans. The chapter on Chickens is particularly detailed, dividing the species according to the classification of layers, meat and ornamental breeds.

ISBN: 978 1580176675  Author: Carol Ekarius

Keeping Chickens—An Australian Guide

This 138-page softcover compact book provides a quick reference guide primarily for the novice. Chapters include Anatomy and Physiology, The Right Chickens for Me, When Do Hens Start to Lay Eggs, Housing, Caring, Breeding and Showing, Resources and Suppliers.

ISBN: 978 0143006381  Author: Nicolas Brasch

The Chicken Health Handbook

This 344-page softcover title, regarded as an essential reference for small flock owners of chicken breeds, successfully translates avian veterinarian-suited information into layman's text. Chapters includes Health and Nutrition, Anatomy, External and Internal Parasites (Worms and Protozoa), Infectious Diseases, Environment-related Problems, Diagnosis Guides, Post-mortem Examination, Therapy, Enhancing Immunity, Incubation and Brooding, Health, Diseases and Disorders.

ISBN: 978 0882666112  Author: Gail Damerow

BIRD FIELD GUIDES – Available on Special Order

The Field Guide to the Birds of Australia

This 508-page eighth edition presents 46 new species—now a total of 820 species—together with a new, visual quick-reference guide on the inside front cover. Contents include Colours and Field Markings, Recognising Birds by Habits and Behaviour, Approaching Birds, Using Binoculars and Spotting Scopes, Observing a Bird's Features, Bird Migration, Abbreviations, Classifying and Naming Australian Birds, Index of Scientific Names and Common Names, Distribution Maps, Species Scientific Name, Size, Description of Male, Female and Immature, Voice, Habitat, Breeding and Nest and Egg details, Range and Status and more. This book is without a doubt the most definitive identification guide available on Australian birds.

ISBN: 978 0207199356  Authors: Graham Pizzey and Frank Knight

Sydney Birds and Where to Find Them

This title features the 30 top bird-watching localities in and around Sydney over 208 glossy colourful pages. Each locality entry lists the key species to look out for and how to access the location. Each species entry provides information on the best spots to find it, its rarity or otherwise, and helpful tips about its habits and haunts, such as where it roosts or nests. Published in conjunction with Birds Australia.

ISBN: 978 1 7417 5476 6  Author: Peter Roberts

Where to See Birds in Victoria

Compiled, written and photographed by a dedicated team from Birds Australia (VIC), this guide features over 40 destinations throughout Victoria which provide habitat for over 500 bird species over 192 glossy colour pages. This title provides information on how to get to each destination, what facilities and accommodation to expect and, importantly, precisely where to look for those special or rare birds, an up-to-date list of birds, with the degree of rarity and where to see it noted for each species.

ISBN: 978 1 7417 5736 1  Editors: Tim Dolby, Penny Johns and Sally Symonds
Reptiles, Amphibians & Fish

SNAKES

Keeping and Breeding Australian Pythons

This comprehensive title on all Australian pythons is a compilation by 16 contributing authors. The 336-page softcover format includes a glossary, index, graphs, charts and numerous colour photographs. Chapters include housing, sexing, breeding, incubation and rearing, diseases and disorders and colour and pattern mutations in captivity and natural habitat and behaviours in the wild. An essential reference for all python enthusiasts.

Soft Cover ISBN 978 0980366709 Edited by Mike Swan

The Biology and Evolution of Australian Snakes

ISBN 094932468X Author: Allen Greer

Snakes of Western Queensland: A Field Guide

136 colour pages, this easy-to-use glove-box sized reference includes details of Legless Lizards and Snakes in this region and their Distribution Maps, Description, Scalation, Habitat and Toxicity.

ISBN 97806465 0947 1 Authors: Angus Emmott and Steve G Wilson

Keeping Carpet Pythons

This 40-page title presents the seven species of Morelia Carpet Pythons with details on Indoor and Outdoor Enclosures, Ventilation, Heating, Lighting, Feeding, Breeding, Ailments and Disorders. Black and white and some colour images.

ISBN 0958605084 Authors: Simon Kortlang and Darren Green

Snakes of South-east Australia

Pocket guide featuring details on General Characteristics of Snakes, Species Identification Key, Worm Snakes, Pythons, Colubrid, Front-fanged and Venomous Snakes—with suggestions on avoiding snake-bites and first-aid procedures. Each species includes full colour glossy photos, basic description, habits and geographical maps.

ISBN: 978 0 6460 0006 0 Author: John Weigel

Spectacular Snakes of Australia

This richly illustrated title presents a pictorial showcase of most Australian snake species. The text describes Reproductive Biology, Behaviour, Predators and Prey as well as Habitat and Conservation Values. The contents are divided into the Boidae, Acrochordidae, Colubridae, Typhlopidae and Elapidae genus. Exquisite photography is the focus of depicting the beauty of dry-country and green pythons, freshwater snakes, keel-backs, tree snakes, colubrid snakes, taipans, tiger snakes, copperheads, brown snakes and more. Superb reference and coffee table item. A CSIRO publication.

ISBN: 978 0 6430 9594 6 Author: Michael Cermak

Page 11
Natural History of Australian Snakes
This 224-page title presents an overview of the ecology, evolution, biology and behaviour of snakes. Beautiful colour photography throughout. Key aspects include snake anatomy such as body shape adaptations, dentition and poison delivery, vision and colouration. Distribution and habitat, reproductive and dietary habits and threats from human and animal predation complete a wonderful journey covering comprehensive aspects of Australian snakes.
ISBN: 1 8763342 5 8  Author: Richard Shine

A WILD AUSTRALIAN GUIDE... Series

These compact guides introduce you to profiles of common and rare Australian birds and reptiles and include full-colour photographs for ease of identification, distribution notes, breeding and behavioural information and even conservation status on each specific species.

AMAZING FACTS ABOUT AUSTRALIAN... Series

Packed full of information, you will be amazed at how much you learn about Australia’s avian and reptile life by dipping into the remarkable facts presented. These books aim to inspire curiosity and a thirst to know more about the unique bird and reptile families that share our natural and urban environments—how they evolved, how they survive and adapt in the face of human progress and how they interact with each other and their surroundings. A list of web sites and reading materials is included for budding enthusiasts.

Field Guide to Australian Birds

Written and illustrated by bird expert, Michael Morcombe, this is one of the most comprehensive field guides to Australian birds available. Over 448 pages information on 850 bird species is supported by paintings and diagrams within a unique system of organisation of detail including a breeding section. Maps define variances in the ranges of species and subspecies.

Field Guide to Australian Birds (Pocket Size)

This slimline 384 page compact edition of the above title is presented in a plastic jacket for durability and includes a QuickFind system of colour tags and Quick Index.

Field Guide to Australian Reptiles

Softcover—272 pages. Essential information on over 350 Australian reptile species depicted in 520 colour photographs in their Natural Habitat. Chapters include Crocodiles, Pig-nosed Turtles, Side-necked Turtles, Geckos, Legless Lizards, Dragons, Monitors, Skinks, Blind Snakes, Pythons, File Snakes, Colubrid Snakes, Water Snakes and Front-fanged Land Snakes. Species details include Description, Habit, Diet, Range, General Comments and Distribution Maps.

ISBN 978 1 7402 1744 6  Author: Stephen Swanson

Field Guide to the Frogs of Australia

This 188-page guide provides accounts of 227 species over the five main Australian frog families—including Size, Status, Distribution, Habitat, Behaviour and Advertisement Call. Supported by distribution maps and colour illustrations.

ISBN: 978 0 6430 9244 0  Authors: Michael J Tyler and Frank Knight
